## History of the Partnership

The Canadian Partnership Against Cancer (the Partnership) works with Canada's cancer community to reduce the burden of cancer through co-ordinated system-level change. Grounded in and informed by the experiences of those most affected by cancer, the organization plays a unique role working with partners to support multi-jurisdictional uptake of the knowledge emerging from cancer research and best practices in order to optimize cancer control planning and drive improvements in quality of practice across the country. Partners include provincial and territorial cancer programs; federal organizations and agencies; First Nations, Inuit and Métis organizations; national health and patient organizations; and individual experts who provide strategic cancer control insight and advice from both patient and professional perspectives.

Through sustained effort and a focus on the full cancer continuum from prevention and treatment through to survivorship and end-of-life care, the Partnership supports the collective work of the broader cancer control community in achieving long-term outcomes that will have a direct impact on the health of Canadians: reduced incidence of cancer, less likelihood of Canadians dying from cancer, and an enhanced quality of life of those affected by cancer. For more information, visit [partnershipagainstcancer.ca](http://partnershipagainstcancer.ca). The Partnership is also the driving force behind [cancerview.ca](http://cancerview.ca), which connects Canadians to cancer control services, information and resources. The Partnership is funded by Health Canada.

### 1.9.3. *Stages of the Proposal Evaluation*

The Partnership may conduct the evaluation of Proposals in the following three (3) stages:

#### Stage I

Stage I will consist of a review to determine which Proposals comply with all of the mandatory requirements. Proposals which do not comply with all of the mandatory requirements, may, subject to the express and implied rights of the Partnership, be disqualified and not be evaluated further.

## Stage II

Stage II may consist of a scoring by the Partnership of each qualified Proposal on the basis of the rating criteria. The Partnership will shortlist the top scoring Proposals and their respective Proponent organizations may be invited to an interview at the Partnership offices. Interviews to be scheduled, at a time that is convenient for the Partnership.

## Stage III

Upon completion of Stage II for all Proposals, the sealed pricing envelope provided by the Proponent(s) that meet the Minimum Required Score will then be opened and Stage III may consist of a scoring of the pricing submitted. The evaluation of price may be undertaken after the evaluation of mandatory requirements (Stage I) and any rated requirements (Stage II) has been completed.

The formula to be used for scoring price is as follows:

$S = MP \times L / P$ , where:

S = the price score for the Proposal being evaluated;  
MP = the maximum points awarded for price;  
L = the price of the lowest price remaining Proposal; and  
P = the price of the Proposal being scored.

## Cumulative Score

At the conclusion of Stage III, the scores from Stage II and Stage III will be added and, subject to satisfactory reference checks and the express and implied rights of the Partnership, the highest scoring Proposal will be selected and the Proponent of that Proposal will be invited to enter into the Agreement in accordance with Sections 1.4, 1.5 and 2.13.

The Partnership intends to award an Agreement to the Proponent who submits the most advantageous Proposal to the Partnership as determined by the Partnership through the evaluation process.

The Proposal with the lowest price will not necessarily be selected. While price is a determinant in the selection process, it is to be clearly understood that there should be a full and complete understanding of the services/deliverables to be provided, demonstrated through the Proposal

as presented, as well as a commitment to the Agreement terms and conditions set out in Schedule F. It is the intention of the Partnership to enter into an Agreement with the Proponent providing the best value to the Partnership as identified through the evaluation process.

If no Proponents demonstrate appropriate qualifications or experience, the Partnership may, without liability cost or penalty, cancel this RFP or choose not to award an Agreement to any of the Proponents.

### **1.10 Pricing and Timing**

Please submit the price for completion of this project (both fees and expenses). The Proponent should assume that it is required to supply all necessary professional staff to undertake the project. The Proponent shall provide *a firm maximum ceiling price* for the assignment and a proposed payment schedule, if applicable. The Proponent should submit pricing (Schedule C) in a separate sealed package or separate electronic file from the rest of the Proposal (see Section 1.3).

### **1.11 AODA Compliance Legislation**

This process would continue until a contract has been executed, the RFP process is terminated or the Proponents have been rejected.

## SCHEDULE A - Services and Deliverables

### Background

Data indicate that more than half of smokers with cancer will continue to smoke after their diagnosis.<sup>1</sup> Recent evidence indicates that continued tobacco use reduces the effectiveness of many cancer treatments and increases the likelihood of morbidity, disease-specific and overall mortality in cancer patients.<sup>2</sup> In fact, evidence suggests that the risk of dying from cancer could be lowered by 30-40% by quitting smoking at the time of diagnosis. For some cancer diagnoses, the benefit of smoking cessation may be equal to, or even exceed, the value of state-of-the-art cancer therapies.<sup>3</sup> Yet, cancer diagnosis and treatment is often unappreciated by health professionals as a teachable moment where tobacco<sup>1</sup>cessation interventions can be implemented.<sup>4-6</sup> Surprisingly few oncologists and cancer care professionals discuss tobacco use with their patients, and tobacco cessation and relapse prevention services are rarely offered in cancer care settings across Canada. A number of reasons underlie this problem in the cancer system: beliefs that quitting once patients have been diagnosed with cancer is “too late,” the topic may create feelings of “blame” and/or “shame” among patients who currently use or previously used tobacco, cancer patients are often already overwhelmed so quitting may be an added stressor, low levels of confidence and skills in tobacco cessation counselling amongst clinicians (e.g., not knowing how to approach the topic with their patients), and assumptions that providing cessation support is another organization or person’s role.

The Partnership) acted on this new information and played a leading role in engaging cancer care and tobacco control leaders from across Canada to strengthen the cancer system’s capacity to provide evidence-based tobacco cessation and relapse prevention services. In 2016, the Partnership funded a first phase of projects, in nine jurisdictions, to plan, implement, or evaluate system-level, evidence-based approaches to tobacco cessation and relapse prevention in cancer care systems, starting with outpatient treatment settings.

### Objectives/Purpose

The Partnership is actively engaging cancer control and tobacco control partners across Canada to integrate evidence-based tobacco cessation within cancer systems. *The Partnership is seeking a vendor to develop a new evidence-based knowledge product for use by cancer agencies and/or provincial/territorial government departments responsible for cancer care.*

The goal of the knowledge product is to support sustainability and/or uptake of evidence-based approaches to tobacco cessation and relapse prevention within

<sup>1</sup> Tobacco refers to non-traditional and/or commercial forms of tobacco, not traditional tobacco used for ceremonial or spiritual purposes.

cancer systems. The knowledge product will support users in developing reports, briefing notes, business cases, and presentations.

## **Project Scope**

### Knowledge Product Content (In Scope)

This knowledge product shall, at a minimum, summarize the following information:

#### *Key Evidence*

- I. High-level findings and summarized information from key peer-reviewed evidence and evidence syntheses on integration of evidence-based approaches to tobacco cessation within cancer care settings (e.g., latest US Surgeon's General's Report on Smoking cancer chapter, other relevant peer-reviewed articles)
  - a) Benefits of smoking cessation and/or harms of continued smoking for radiation therapy, chemotherapy and cancer surgery, where possible by disease site
  - b) Benefits of smoking cessation and/or harms of continued smoking for cancer recurrence, where possible by disease site
  - c) Benefits of smoking cessation and/or harms of continued smoking on mortality, where possible by disease site
  - d) Benefits of smoking cessation and/or harms of continued smoking on comorbidities
  - e) Benefits of smoking cessation and/or harms of continued smoking on quality of life
- II. Cost-effective tobacco cessation interventions for cancer patients

#### *Key Statistics*

- I. #/% of cancer patients who use tobacco by province/territory (recently reported in our [System Performance report](#))
- II. #/% of cancer patients who use tobacco by province/territory and are eligible for coverage by federal, provincial or territorial cessation aid programs, where possible
- III. #/% of cancer patients who use tobacco by province/territory and have private health insurance coverage, where possible

#### *Key Cost Estimates*

- I. Contrast average costs of various cessation interventions with average costs of usual cancer treatments:
  - a) Average costs of various evidence-based tobacco cessation interventions per cancer patient, per usual/recommended course
    - i. Brief advice
    - ii. Intensive counselling
    - iii. NRT (patch, gum, lozenge, spray, inhaler etc)

- iv. Medications (Bupropion + Varenicline)
    - v. Combination of counselling + NRT/meds
  - b) Average costs of cancer treatment (radiation therapy, chemotherapy, surgery) among for all cancer patients or by major disease sites (e.g., five most prevalent/relevant disease sites)
- II. Estimate potential cost savings to the cancer system by providing cessation support to cancer patients (e.g., avoided costs for patients who quit such as less chemotherapeutic agents required, reduced toxicity of cancer treatments - surgical complications, hospitalization, infection, woundhealing etc)

#### *Key Stories*

- I. Incorporate a person-centred perspective, including a story from at least one cancer patient's experience accessing support within the cancer system to quit smoking

#### Knowledge Product Content (Out-of-Scope Content)

This knowledge product will not contain the following information:

- I. Analysis and presentation of average treatment costs among smoking and non-smoking cancer patients; this will likely require a longer timeframe for completion, and as such, is not in scope at this time.
- II. In addition, analysis and presentation of the economic burden of smoking among cancer patients to the health care system may require a longer timeframe for completion, and is not in scope at this time.

#### Knowledge Product Format

Develop materials to obtain input and feedback from the Partnership's small external Smoking Cessation in Cancer Settings Working Group (made up of representative from cancer agencies and provincial governments).
- 5) Engage and obtain input from the Working Group, via teleconference.
- 6) Integrate feedback and deliver a final knowledge product to the Partnership, including all relevant electronic files (by December 31, 2016).
